

Medica Brush®

A disposable scrub brush with sponge

Medica Brush® is designed for cleaning:

- nails with the nail cleaner
- nails and knuckles with the sponge
- hands and forearms with the sponge

A cross cut shows:

- the soft long hairs for mild cleaning of the knuckles
- the short hairs for perfect cleaning under the nails

Squeeze and release:

- squeezing the brush ensures the sponge to absorb more water for optimal cleaning of hands and forearms

Production of the Medica Brush® is a fully automatic process which ensures a constant quality in assembling brush and sponge.
